

## Telligen Iowa Quality Innovation Network Stakeholder Report — June 2015

### About Quality Innovation Networks and Quality Improvement Organizations

The Centers for Medicare & Medicaid Services leads a national health care quality improvement program. The program is implemented locally by an independent network of QIOs in each state and territory. We convene providers, practitioners, and patients to build and share knowledge, spread best practices, and achieve rapid, wide-scale improvements in patient care, increases in population health, and decreases in health care costs for all Americans.

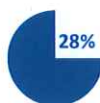

#### CARDIAC HEALTH

About **2,200 people** die every day from cardiovascular diseases.

- 122** | eligible providers working with Telligen
- 120** | eligible providers receiving technical help
- 35** | home health agencies working with Telligen
